

AMOPPORTUNITIES

EXPANDED CLINICAL TRAINING OPTIONS

FOR YOUR STUDENTS

WHO IS AMO Opportunities?

AMO provides students and schools across the globe with U.S. clinical experiences at 250+ actively maintained rotation sites through our platform, enabling students to meet their school's curricular requirements and graduate on-time. We recruit sites and manage the application process, allowing you and your students to focus on what's important: Education.

Through our services and online platform, we enable U.S. hospitals and clinics to expand their clinical training to the larger U.S. and international medical community.

PARTNERING WITH AMO

Expand opportunities for your students with an AMO partnership.

Simplify your school's student experience.

Your partnership comes with:

- No upfront costs
- Curriculum-approved programs
- Free access to our management platform

Your students gain

- Access to 250+ clinical experiences
- Personalized support before, during, and after their rotation
- Guaranteed placement in rotations that work for the school's schedule and curriculum requirements

FULL CONTROL OVER PAYMENTS

You decide how and who pays for your students' rotations.

Create a seamless student experience with **school-funded clinical training** or **have students pay for their own clinicals**. AMO will also work with you to help establish full or partial scholarships that you make available to your students.

Cohort discounts are also available. AMO covers malpractice and HIPAA costs for cohorts of 10–19 students. For cohorts of 20 or more, AMO also discounts \$150 per student rotation.

PARTNERED WITH TOP U.S. HOSPITALS

SOFTWARE THAT POWERS YOUR CLERKSHIPS

An AMO partnership gives you **FREE** access to our management platform which puts tracking student progress at your fingertips. Our platform centralizes all student applications to clinical training sites.

When your students reserve a clinical experience on the AMO platform, their details sync to your management platform in real time.

With the management platform you can:

- View and search for clinical training sites that meet your student needs
- Create applications and reserve spots on behalf of your students
- View student application materials and upload documents on their behalf
- Confirm your students' application status
- Centralize preceptor evaluation forms
- View program details, including start and end dates and preceptor information

VIRTUAL ROTATIONS

Virtual rotations let your students rotate from anywhere.

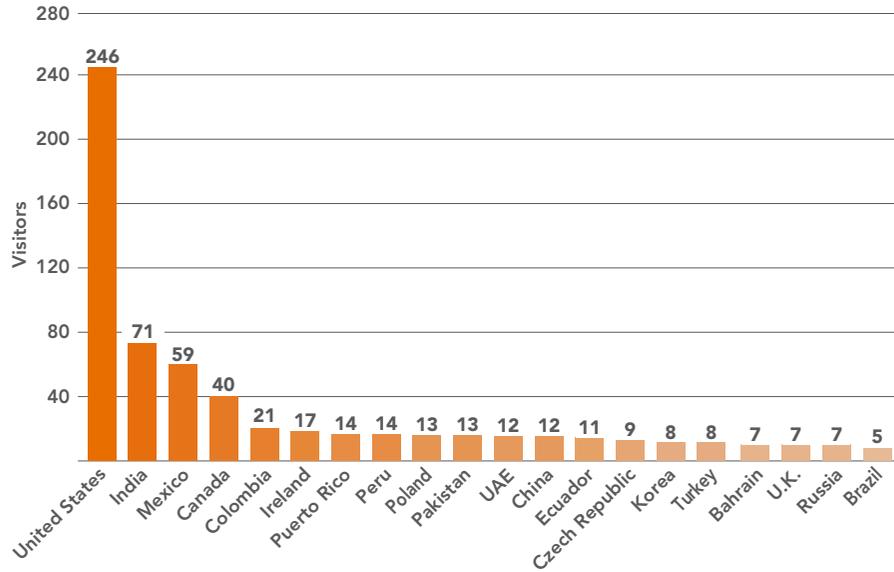

With virtual rotations, students:

- Step into the clinic with real-time doctor/patient interactions
- May participate in differential diagnosis and recording medical histories
- Earn quality LoRs for their residency applications
- Engage with the U.S. healthcare system

VISITOR STATS

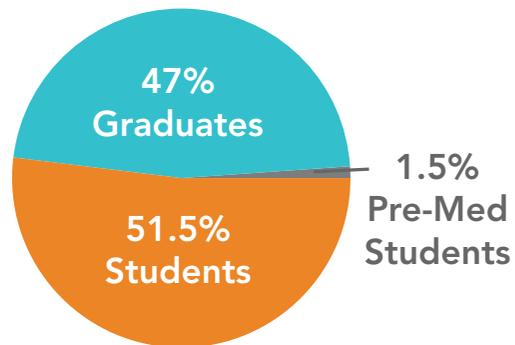

In 2021, AMO trainees participated in 1,036 rotations.

AMO trainees came from 93 countries.

Our clinical experiences are available to students no matter where they are in their medical education.

In 2021, we hosted students, graduates, and pre-med students.

CASE STUDY

INCREASED ACCESS

Facing a shortage of rotations in specific specialties and locations, a U.S. medical school reached out to AMO to expand clinical training for its medical students.

FINDING SEATS

Through the AMO management software, clinical coordinators at the school view, select, and reserve clinical rotations that meet the school's curriculum requirements in their preferred specialty and location. Because AMO's programs are on-demand with guaranteed seating, the school's clinical coordinators can find seats and reserve programs that work for student schedules.

INTEGRATING THE STUDENT EXPERIENCE

The school's clinical coordinators work with the AMO Visitor Experience Coaches to arrange submission of immunization records, academic records, and other required documents.

The school funds its students' clinical training, as rotation costs for students are already factored into their tuition.
